# What is Float?

Float provides you with reliable, real-time cash flow forecasts and insight that will answer your 'what if' questions and empower you to make more confident decisions about your business. Float takes the guesswork out of your cash flow and will help your business thrive.

Float automatically imports all accounts, transactions, invoices and bills and updates your cash predictions with actuals, providing real-time insights and helping you unlock a brighter future for your business. Build scenarios to understand the impact of your future plans, compare budgets vs actuals, and update bills and invoices to when they will likely be paid.

# How Float can help your business

**Understand your cash position, right now**

Float gives you a clear, visual view of what's happening with your business' cash today and in the future, based on real-time information.

**Real-time insight with less time and effort**

Float automatically syncs to your accounting software so you can easily see cash moving in and out, and which bills or invoices are yet to be paid.

**Plan for the what-ifs**

Float makes it easy to run scenarios based on your current cash position and see what could happen if you make a hire, lose a client, or increase expenses.

**Compare your budgets vs your actuals**

Easily compare your actuals to your forecasts to see how accurate your forecasting has been, enabling you to improve your predictions for the future.

**Understand the details or see the bigger picture**

Get a clear overview of your past and future cash transactions each day. You can drill down to next week, or forecast up to three years ahead, so there are no nasty surprises.

# “Float is like a magnifying glass into our finances.”

“It provides invaluable insight and transparency and gives us confidence to make decisions.

We’re no longer afraid of thinking strategically or investing in the growth of our business”
